

Shop Titans gem farming Guide

Efficient Crafting for gems!

Method 1: Involved (Focused Enchanting for Max Efficiency)

Step 1: Narrow Your Focus

Choose 2 enchants to focus on (e.g., Levi and Water). This lets you streamline resources and bin usage and get more energy.

Step 2: Bin Setup

You'll need:

- 3 bins each of:
 - Ironwood
 - Ether
 - Leather
 - Fabric
- 4–5 bins of ESS 15+ (Essence)

Total: Up to 17 bins

Put all other bins away to make more room for more energy .

Step 3: Talent Tree + Crafting

- Use the talent tree setup you referenced.
 - Make sure you finish all crafting but fusing and are at 300% worker resource minimum extra points finish fusing and then barter tree.
-

Step 4: Timing Zolea

- Zolea appears every 2 hours.
- Keep ess storage below 30% when she's due.
- If another worker like leather shows up instead, Zolea gets delayed by 2 hours.
- To avoid this:
 - Leave a worker at the counter (Champions don't count).
 - Only one worker is allowed at the counter at a time.

When Zolea count down clock is ready (about 1-2 hours after last worker), buy their items to free up the counter and wait for zolea. I refuse everything to give her more chance to show up if a differnt worker sneaks in don't refuse then doesn't matter the timer reset but their stuff and cry....

Step 5: Resource Gathering

- Disassemble Tier 7–12 items.
 - You get back the same resources used to craft them — look for high-yield gear at good prices.
-

Step 6: Gear Buying Tips

- Buy gear to discount- tier is based on your available energy. But at least 10 higher the quicker to get back to buildin

- Avoid overflowing your energy storage if you can but some waste happens don't sweat it.
 - Expect to spend 10g per day — but you'll make it back and more through sales.
 - Avoid major losses. Don't spend more than 2x the item's base value before tax.
-

Selling Strategy

- White & Green enchants → Sell for gold
- Blue and above → Sell for gems

Recommended gem pricing:

- Blues (good): 12+ gems
- Blues (trash/spirits): 10+ gems
- Epics (good): 50+ gems
- Epics (trash): 30+ gems
- Legendaries (good): 350–400+ gems
- Legendaries (trash): 200+ gems

Gold values:

- Commons: 15m+
 - Greens: 40m+
-

Disassemble or sell?

Afte

- fuse to Epic/Legendary to earn more gems but you will go negative gold with this method (have a reserve)
 - Sell greens and white for gold will cost you gems but will keep you with positive cash flow
-

Method 2: Casual (All-Enchant Approach)

This method is more relaxed but less gem-efficient.

Setup:

- 3 bins of all Tier 1 materials
- 2 bins of all Tier 2–3 materials
- 4–5 ESS bins

Make all enchant types instead of just two.

- Disassemble your items you buy after crafting to keep going
 - Or wait a few minutes for bins to refill
 - Expect 500–1000 gems/day, depending on luck
-

General Tips

- Max 5 of each table and shelf for faster turnover
- Keep at least 200 gear slots open for customers, and block off the rest of your store to speed up sales

- Use extra gems to buy additional shop slots beyond the 9 expansions — improves energy cap
- Aim for 7000+ energy to auto-surcharge Tier 15 gear
